## About the Journal

---

The BU R&D Journal is an annual multidisciplinary journal managed and published by Bicol University through the Publication and Knowledge Management Division under the Office of the Vice President for Research, Development, and Extension. It aims to disseminate research findings and recommendations, and thus contribute to and evolve educational, scientific, technological, cultural and psycho-sociohistorical knowledge. Papers submitted for publication will undergo a double-blind peer review before final approval for publication.

Contents of this journal may not be reproduced except for noncommercial, personal, educational, and research purposes. Publication in the BU R&D Journal does not entail article processing charges (APCs), submission charges, page charges, color charges, and any similar charges for Bicol University (BU)-affiliated authors. A minimal publication fee will be charged for non-BU authors.
